

KANSAGARA KRISH KALPESHBHAI

+91 8320690850 Mahesana, Gujarat kansagara.krish2006@gmail.com

ABOUT ME

B.Tech student with a strong foundation in Artificial Intelligence and Machine Learning, passionate about building data-driven and intelligent solutions. Skilled in applying ML algorithms, data analysis, and model development to solve real-world problems. A quick learner with a strong problem-solving mindset, eager to contribute to innovative projects and grow in a challenging technical environment.

EDUCATION

GANPAT UNIVERSITY
Btech Computer Engineering
CGPA: 8.3(current) | 2023 – 2027

CLASS 12
Gujarati Medium
Per: 60% | 2023

CLASS 10
Gujarati Medium
per: 92% | 2021

SKILL

Frontend: HTML, CSS, JS, Tailwind
CSS, Web Designing

Backend: Python, PHP

Frameworks: Django, Flask

Advanced Tech: AI, Machine
Learning, TensorFlow

LANGUAGE KNOWN

English | Hindi | Gujarati

PROJECT'S

Aura - Personal AI Assistant PYTHON AI/ML AUTOMATION

An AI-powered personal assistant that controls your laptop, automates tasks, and integrates with voice and text commands for a seamless experience.

Home Theatre Management System HTML/CSS JAVASCRIPT PHP

The Home Theater Management System is a Responsive web-based platform that streamlines the design and construction of personalized home-theater projects. It provides role-based access, efficient data handling, and built-in calculators to ensure accurate, secure, and organized project execution.

Fair Salary Prediction Matplotlib Seaborn Scikit-learn NumPy Pandas

Linear Regression & Random Forest model for predicting employee salary. Use Real life data.

Personal Portfolio HTML/CSS JAVASCRIPT Tailwind

Modern, responsive portfolio showcasing skills and projects. JS powered Speech introduction.

Capstone Project CIFAR-10 Image Recognition | Python, TensorFlow, Keras

Developed a multi-layer CNN architecture featuring Convolutional, MaxPooling, and Dropout layers to mitigate overfitting and enhance feature extraction. Evaluated performance using accuracy metrics and confusion matrices, achieving high classification precision across vehicle and animal classes.

Querify – AI Document Intelligence Platform RAG, LangChain, Python

Architected a Retrieval-Augmented Generation (RAG) pipeline using LangChain to enable natural-language querying of unstructured data (PDF, DOCX, TXT). Optimized retrieval accuracy through advanced prompt engineering and document chunking strategies to provide grounded, context-aware responses.

INTERNSHIP

- Completed Mentorship Program on Machine Learning with Launched Global in collaboration with Kshitij, IIT Kharagpur, gaining strong foundations in ML. Enhanced problem-solving and analytical skills through hands-on projects and mentorship.
- Completed 4-week IBM Skills Build Program with CSRBOX on Agentic AI: From Learner to Builder – Become an AI Agent Architect. Gained skills in AI agent development, problem-solving, and practical implementation of Agentic AI systems

HACKATHON

- Participated in Odoo × Adani University Hackathon '26 at Adani University, working on real-world problem statements using software and automation concepts.
- Participated in WIE HackX2025 organized by Nirma University, Ahmedabad, focusing on rapid ideation and solution development in a competitive hackathon environment.
